

Pmod Stereo DAC: the two 1-bit delta-sigma outputs of eda/dvi_hub75 (rtl/hdmi_rx, 6.19 MHz) to a 3.5 mm stereo jack.

Per channel (eda/dvi_hub75/README.md): 1k / 3.3n and 10k / 330p RC (both ~48 kHz), 1 uF DC block, 100k bleeder.

−3 dB ~28.5 kHz, 20 kHz −1.6 dB, 6.19 MHz −85 dB (with ~30 ohm pin impedance). Flatter: C1 / C11 2.2n, C2 / C12 220p.

Line level (~1.1 Vrms full scale, ~10 kohm source): headphones need an amplifier. Pmod 3.3 V is not used.

J3 carries the same outputs as the jack (after the DC block): 1 = L, 2 = GND, 3 = R.

Line output for the delta-sigma DAC of eda/dvi_hub75 (HDMI audio)
